SCAN FOR THE REELS

HELLO

I make images for a living: visual effects, CGI, and AI where it actually wins, from the brief to the final frame. Seven years across feature film, music video and advertising, most recently a year of campaign CGI at Publicis Groupe for IQOS, Visa, Galaxy, Emirates NBD and Saudia Airlines.

I'm a generalist on purpose: I'd rather pick the right method for the shot than defend one way of working. Freelance now, anywhere in the UAE or remote, for anything from a single difficult shot to a whole campaign.
